PUNYAPAL SHAH

Laravel Engineer • Open Source Maintainer • Technical Content Creator

Email: mrpunyapal@gmail.com • Web: mrpunyapal.dev • GitHub: github.com/MrPunyapal • LinkedIn: linkedin.com/in/mrpunyapal • Twitter: x.com/MrPunyapal • Location: Ahmedabad, India

PROFESSIONAL SUMMARY

Laravel Engineer building production applications, developer tooling, and open-source software for the PHP and Laravel ecosystems. Core Team member at Pest and Pinkary, collaborator on panphp, and founder of Laravel Artisans. Author and maintainer of Pest's official PHPStan and Rector plugins. Maintainer of Laravel packages and contributor to 100+ open-source repositories.

ENGINEERING EXPERTISE

Laravel Ecosystem
Laravel, PHP, Livewire, Filament, Blade, Inertia.js, Alpine.js, Tailwind CSS

Testing & Developer Tooling
Pest, PHPUnit, PHPStan, Rector, Laravel Pint, Static Analysis, Automated Refactoring, LLM Integrations, Structured Data Extraction

Architecture & Data
Multi-tenancy, Queues, Task Scheduling, Caching, WebSockets, MySQL, PostgreSQL, SQLite, Eloquent ORM

Cloud, AI & Integrations
Laravel Cloud, Laravel Forge, AWS, Cloudflare, OpenAI, Stripe, Razorpay, PayPal, Twilio

PROFESSIONAL EXPERIENCE

More projects →

Freelance, Senior Laravel Engineer

July 2020 – Present

- Engineered and shipped features for production multi-tenant SaaS platforms, ecommerce applications, and booking engines using the TALL stack and Filament, integrating payment gateways including Stripe, PayPal, and Razorpay, and communication services including Twilio and Dialpad.
- Upgraded legacy Laravel applications from 5.x and 7.x up to 11.x and 12.x, modernizing dependencies, Livewire, Filament, and PHP versions while maintaining application stability.
- Designed and implemented testing architectures around existing applications using Pest and PHPUnit, expanding test coverage from 0% to 100% on mission-critical workflows.
- Audited domain-driven Laravel codebases and established static analysis with PHPStan, automated refactoring with Rector, and coding standards to improve maintainability.
- Optimized application performance and database responsiveness by diagnosing N+1 queries, optimizing database indexes, and implementing query caching strategies.
- Built custom AI data extraction tooling leveraging LLM workflows to convert unstructured input into structured records and reduce manual data entry.

ShubhKey Infotech LLP, Lead Engineer

Aug 2022 – Sep 2024

- Led engineering and developed a full-scale freelance marketplace end to end, building real-time messaging, contract management, billing, and activity monitoring using WebSockets and the TALL stack.
- Migrated legacy codebases to modern Laravel architecture, refactored REST APIs, and established standardized engineering practices across the development team.
- Built a dynamic survey platform for medical patients using Filament, featuring custom question logic that adapts based on conditional patient responses.
- Mentored junior engineers on Laravel design patterns, code review standards, static analysis, and automated testing best practices.

Maven InfoTech, Sr. Full Stack Developer

Feb 2022 – Aug 2022

- Engineered a multi-carrier shipping and logistics platform featuring automated ZIP code zone mapping, carrier selection algorithms, deliverability validation, and real-time shipping label PDF generation.
- Migrated legacy Drupal and CorePHP applications to modern Laravel architecture for a yacht charter booking platform, introducing multi-lingual date-range booking and dynamic pricing while boosting performance by 80%+.
- Integrated third-party APIs including DocuSign (webhooks & signature request workflows), Stripe & digital wallet payments, WhatsApp Business queued messaging broadcasts, and Facebook Graph API.
- Built background queue processing and cron automation for late-fee calculations, attendance tracking, bulk communications, and editorial workflow tooling across client systems.

OPEN SOURCE & COMMUNITY

View more →

Core Team

- **Pest:** Core Team member contributing across the core testing framework and plugin ecosystem.
- **Pinkary:** Core team member contributing to an open-source Laravel social platform.
- **panphp/pan:** Collaborator on a lightweight PHP product analytics library.

Featured Projects

- **pest-plugin-rector:** Author and maintainer of Pest's official Rector plugin for automated test refactoring.
- **pest-plugin-phpstan:** Author and maintainer of Pest's official PHPStan plugin for static analysis.
- **laravel-extended-relationships:** Maintainer of Eloquent relationship extensions for complex domain models.
- **laravel-auditor:** Evidence-based audit tooling for Laravel applications.
- **filament-infinite-select:** Infinite scrolling select field for Filament applications.
- **Open Source Utilities:** Author and maintainer of `livewire-chat-app`, `laravel-auth-jobs`, and `laravel-extended-commands`.

Community Leadership

- **Laravel Artisans:** Founder of a 5,000+ developer community across multiple developer platforms.
- **Laravel Ahmedabad:** Organizer running local Laravel engineering meetups in Ahmedabad.
- **Laracon India 2025:** Volunteer supporting conference operations.

Speaking Engagements

- **"Write code that can fix itself"** – Laracon India, Laravel Bangalore, Laravel Moris (Remote)
- **"Types in PHP at a Glance with PHPStan"** – Laravel Ahmedabad, Laravel Indore, Laravel Kozhikode
- **"From Zero to Tested: Laravel + PestPHP"** – Laravel Ahmedabad
- **"Broadcasting in Laravel"** – Laravel Ahmedabad

EDUCATION

Bachelor of Technology (B.Tech) - Information Technology

2016 – 2020

U.V. Patel College of Engineering, Ganpat University
